

Technical Fact Sheet

3M 1080 Series

3M™ Wrap Film Series 1080 is a dual cast car wrap film that features a removable, pressure-activated adhesive with non-visible air release channels. The 60-inch width allows you to wrap almost any section of a vehicle without seams. The material is soft and flexible allowing it to conform to contours and bend easily. The pressure-activated adhesive allows you to slide and reposition the film until you apply firm pressure. The non-visible air release channels assure a fast, easy and virtually bubble-free installation. This material can be used on the interior or exterior of your vehicle such as bonnet, roof, boot, dash parts, mirrors, trims, or you can even wrap the whole exterior of the vehicle. It offers long-term removability from painted surfaces and does not require an over laminate. Which means you can enjoy your personalised look without having to be off the road for too long.

Important Note

All statements, technical information and recommendation are based on tests we believe to be reliable, but the accuracy or completeness thereof is not guaranteed, and the following is made in lieu of all warranties of merchantability and fitness for the purpose: Sellers and manufacturer's only obligation shall be to replace such quantity of the product proved to be defective. Before using, user shall determine the suitability of the product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.

Technical Fact Sheet

Features

- Pressure-activated adhesive for easy sliding, tacking, snap up and repositioning
- Non-visible, air release channels for fast, easy, bubble-free installations
- 3.5 mil cast film for easier handling and good conformability and lifting resistance
- 1.52 m wide for covering larger vehicle parts in one piece
