

Technical Fact Sheet

Neschen PET Silver Gold Chrome

Neschen PET Silver Gold Chrome is a printable, gold or silver colored through-dyed, self-adhesive polymeric film. It is slightly translucent, has a glossy surface and is characterized by very good shrink resistance. The film features the proven easy dot® adhesive technology. It is therefore very easy to apply and can also be removed again if necessary. The adhesive technology ensures easy repositioning. Neschen PET Silver Gold Chrome is ideal for smooth surfaces indoors and outdoors. Any shapes and letters can be plotted or die-cut from the film. It is also suitable for application to shop window interiors by plotting or die-cutting the motif in mirror image.

Features

- Dry application
- Easy and bubble-free application
- Removable without residue
- Plotting and punching of shapes and letters
- Mirror-inverted plotting or die-cutting for shop windows
- Through-dyed, glossy material

Technical Fact Sheet

- For indoor and outdoor applications
-

Important Note

All statements, technical information and recommendation are based on tests we believe to be reliable, but the accuracy or completeness thereof is not guaranteed, and the following is made in lieu of all warranties of merchantability and fitness for the purpose: Sellers and manufacturer's only obligation shall be to replace such quantity of the product proved to be defective. Before using, user shall determine the suitability of the product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.

Print Process

Suitable for (Eco) Solvent, Latex and UV-curable inks

Application Text

- Ideal for plotted Christmas decoration on shop windows
- Good suitability for plotting and cutting of any shapes and big letters

Technical Fact Sheet

- For transferring of connected letters we recommend application tape with low adhesive force
- Mirror-inverted plotting allows the application on the inside of shop windows
- For midterm indoor and short term outdoor applications
- For application on a wide range of substrates (on most of the commercially available panels etc.)
- Not applicable on freshly lacquered surfaces
- Can be applied on smooth and slightly curved surfaces
