

# Technical Fact Sheet

## Ace Screenboard FSC Offset (S)

A twin sided display board intended primarily for screen printing, the triple coated surface provides superior printing characteristics. Ace Screenboard also has outstanding bulk, thickness and stiffness qualities.

---

### Features

- Twin-sided display board designed primarily for screen printing and offset printing
- Triple-coated bright white surface for superior print quality and colour reproduction
- High bulk and stiffness provide strong structural stability for display applications
- Smooth coated surfaces on both sides enhance graphics and image clarity
- FSC® certified (licence FSC® C010628) fibre-based material supporting responsible forestry sourcing
- Excellent dimensional stability helps the board stay flat during printing and finishing

# *Technical Fact Sheet*
