

Technical Fact Sheet

Neschen Gudy

Neschen Gudy is an optically clear pull-on film with a permanent and a reversible adhesive side. The reversible adhesive side has a structured adhesive layer. This allows gudy window to be repositioned, applied without bubbles and removed from smooth surfaces without leaving any residue. Advertising messages or graphics can be stuck behind glass with gudy window. Thanks to double-sided cover, it can be processed into cut- to-size formats. The self-wound material is suitable for both manual (reversible adhesive side) and machine processing, eg Neschen laminators.
