

Technical Fact Sheet

Ace HCB Core Bulk FSC

Ace HCB Core Bulk FSC is a lightweight fibre-based rigid board designed for signage, display and structural applications. Built with a honeycomb-style core, it provides excellent strength and rigidity while remaining lightweight, making it ideal for retail displays, exhibition structures and point-of-sale graphics.

Features

- Lightweight carton board engineered for strong structural integrity and stability
- Smooth, flat printable surface suitable for high-resolution graphics and vibrant print results
- Designed for display, advertising, retail signage and interior design applications
- Durable construction allows the board to maintain rigidity while remaining lightweight
- Fibre-based material offers an environmentally responsible alternative to plastic signage boards
- FSC® certified materials supporting responsible forestry sourcing and sustainability (licensed code FSC® C010628)

Technical Fact Sheet

- Fully recyclable substrate suitable for sustainable display and signage projects
- Available in sheet sizes such as 1220 × 2440 mm and thickness options like 5 mm
