

Technical Fact Sheet

Ace HCB

Ace HCB is an innovative lightweight carton board, engineered for exceptional structural integrity and outstanding print quality. Its smooth and flat surface is ideal for high-resolution printing, ensuring vibrant and precise graphics that elevate any project. The board's design offers durability and versatility, making it perfect for a range of creative applications, including advertising, displays, and interior design. Crafted from sustainable materials, FSC® certified and fully recyclable.

Features

- Lightweight carton board engineered for strong structural integrity and stability
- Smooth, flat printable surface suitable for high-resolution graphics and vibrant print results
- Designed for display, advertising, retail signage and interior design applications
- Durable construction allows the board to maintain rigidity while remaining lightweight
- Fibre-based material offers an environmentally responsible alternative to plastic signage boards
- FSC® certified materials supporting responsible forestry sourcing and sustainability (licensed code FSC® C010628)
- Fully recyclable substrate suitable for sustainable display and signage projects

Technical Fact Sheet

- Available in sheet sizes such as 1220 × 2440 mm and thickness options like 5 mm
