Important Note

All statements, technical information and recommendation are based on tests we believe to be reliable, but the accuracy or completeness thereof is not guaranteed, and the following is made in lieu of all warranties of merchantability and fitness for the purpose: Sellers and manufacturer's only obligation shall be to replace such quantity of the product proved to be defective. Before using, user shall determine the suitability of the product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.

Print Process

Print Techniques

Suitable for widely used print techniques, including offset lithography, letterpress, embossing, debossing, silkscreening, die-stamping and foil-blocking. A pre-test is

Technical Fact Sheet

recommended for thermography.

Preparation

Avoid extreme humidity or temperature condition and keep the paper as long as possible in the wrapper before use.

Inks

We recommend using fully oxidising inks. Please consult your ink manufacturer for specific colours or formulations. Curious Metallics do not contain ground metals and are not foil papers

Screen Ruling

We recommend screen rulings of 130-163 lpi to obtain the best result

Laminating

The paper accepts laminates easily, although some 'silvering' may occur. Increase laminating pressure and apply excess adhesive to help reduce silvering. Laminates will reduce or negate the metallic effect

Spraying

We recommend using spray powder with a particle size of 35 microns or above when printing board weights.

Digital Printing

Curious Metallics is suitable for Dry Toner and HP Indigo printing
