

Technical Fact Sheet

Hahnemühle Protective Spray

Hahnemühle Protective Spray protects digital Fine Art prints from external influences. The aerosol spray lays like a fine film on the paper, without changing the paper structure. It fixes colours of pigment-and dye ink and prevents an eventual colour fading also the intensity and the high brilliance of the colours stay permanently. The coating increases the abrasion resistance of Fine Art papers, so the risk of fingerprint marks and scratches are reduced. Hahnemühle Protective Spray contains a UV absorber and thus offers additional protection against UV light. The improved formulation is fast drying. A yellowing of the print due to the spray is not possible.

Features

Advantages of the formula:

- No yellowing
- Easy to apply
- Permanent stay of intensity and the high brilliance

Technical Fact Sheet

- Fast-drying
- Protects and seals the print
- Made in Germany
