

Technical Fact Sheet

Hahnemuhle Varnish

Hahnemuhle Varnish will professionally add a protective finish to the surface of your canvas inkjet prints. This fast drying varnish comes as a ready-to-use mixture and can easily be applied with a foam roller. Hahnemuhle Varnish is water-based. It adds richness to the blacks and color gamut of pigment and ultrachrome inks. It also preserves your colors from fading. Additionally, the varnish will protect your canvases from cracking and guards against fungals caused by environments with high humidity. The varnish leaves nothing but a clear coating after application. Available in 1 litre bottles.
