

Technical Fact Sheet

3M Colour Stable 20

Smart style and comfort. The Color Stable series rivals tinted factory glass in its rich appearance. Since the nano-carbon is dispersed throughout the thickness of the film, it ensures years of performance. Rejects up to 57% of the total solar energy coming through your windows to keep you cool and protect you from harmful UV rays. Available in tint levels that block up to 95% of visible light, providing increased privacy to protect you and your valuables.

Features

- Smart style and comfort. The Color Stable series rivals tinted factory glass in its rich appearance. Since the nano-carbon is dispersed throughout the thickness of the film, it ensures years of performance.
- Rejects up to 57% of the total solar energy coming through your windows to keep you cool and protect you from harmful UV rays.
- Available in tint levels that block up to 95% of visible light, providing increased privacy to protect you and your valuables.
- Significantly reduces the glare from blinding sunlight, allowing you to see better and focus more on the road
- Blocks up to 99% of ultraviolet (UV) light to provide sun protection for you and your passengers

Technical Fact Sheet

- Non-metallised window film lets you stay connected with mobile devices, GPS or satellite radio reception without interference
- Sold and installed by 3M™ Installers, our films are durable, virtually maintenance-free and backed by a limited lifetime warranty.

Important Note

All statements, technical information and recommendation are based on tests we believe to be reliable, but the accuracy or completeness thereof is not guaranteed, and the following is made in lieu of all warranties of merchantability and fitness for the purpose: Sellers and manufacturer's only obligation shall be to replace such quantity of the product proved to be defective. Before using, user shall determine the suitability of the product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.
